

## Taller CinvesPy

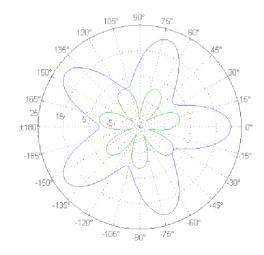

python para románticos y aficionados

## 21 y 22 de Noviembre, 2017

Departamento de Física CINVESTAV, CDMX

|             | 21 de noviembre                     |  | Duración(mins) |                     | chairman    |
|-------------|-------------------------------------|--|----------------|---------------------|-------------|
| 9:00-9:25   | registro                            |  | 30             |                     |             |
| 9:25-9:30   | Inauguracion                        |  | 5              |                     |             |
| 9:30-9:40   | pasos basicos                       |  | 10             |                     |             |
| 09:40-11:10 | Python para principiantes           |  | 90             | Jorge Venzor        | Tonatiuh    |
| 11:10-11:20 | CAFE                                |  | 20             |                     |             |
| 11:20-12:50 | numpy, scipy                        |  | 90             | Omar Abel           | Mariana     |
| 12:50-13:40 | matplotlib, seaborn                 |  | 50             | David Tamayo        | Mariana     |
| 13:40-15:00 | COMIDA                              |  | 80             |                     |             |
| 15:00-16:20 | pandas + Bokeh                      |  | 80             | Raúl Peralta        | Jose Manuel |
| 16:20-16:40 | CAFE                                |  | 20             |                     |             |
| 16:40-17:30 | Spark                               |  | 50             | Paco Mekler         | Jose Manuel |
| 17:30-18:00 | cython                              |  | 30             | Jose Manuel         | David       |
| 18:00-18:30 | Modelo de epidemiologia en python   |  | 30             | Jorge Velazquez     | David       |
|             |                                     |  |                |                     |             |
|             | 22 de noviembre                     |  | Duración(mins) |                     | chairman    |
| 9:30-10:00  | Django                              |  | 30             | Mauricio Munguía    | Luis Tellez |
| 10:00-10:30 | Modelando redes dinámicas con Netwo |  | 30             | Andres Anzo         | Luis Tellez |
| 10:30-11:00 | Redes Neuronales Profundas en Pytho |  | 30             | Erik Zamora         | Luis Tellez |
| 11:00-11:20 | CAFE                                |  | 20             |                     |             |
| 11:20-12:10 | scikit-learn, luigi y pandas        |  | 50             | Andrea Navarrete    | Ana         |
| 12:10-13:00 | PyMC3                               |  | 50             | Adolfo Martinez     | Ana         |
| 13:00-15:00 | COMIDA                              |  | 120            |                     |             |
| 15:00-16:20 | scikit-learn                        |  | 80             | Jorge Martinez      | Ana         |
| 16:20-16:40 | CAFE                                |  | 20             |                     |             |
| 16:40-17:10 | Multiprocessing                     |  | 30             | Omar Abel Rodriguez | Jonathan    |
| 17:10:17:40 | Simulando la union PN usando Python |  | 30             | Carlos Hernández    | Jonathan    |
| 17:40-18:10 | Estimacion de parametros            |  | 30             | Mariana Jaber       | Jonathan    |
